

8 Ponds Pass — Trail Blazer System

Single Blazer

These are found throughout the length of the trail marking the correct direction. They are placed 70-200 paces apart: closer if guiding you through a potentially confusing section of crossing trails, and farther apart if the trail stays uninterrupted.

Double Blazer

Found at junctions where the current trail will divert off its seemingly natural course to another trail in a different direction. These are intended to call your attention and ask that you stop and look for the next single blazer on the correct trail before proceeding.

Cross Blazer

Located at road crossings. Stop, look both ways, and proceed with across the road.
